

**Keurig Green Mountain, Inc.**  
**Conflict Minerals Report**

For the reporting period from January 1, 2017 to December 31, 2017

**Introduction**

Keurig Green Mountain, Inc. (the “Company” or “Keurig”) is committed to sourcing components and materials from companies that share our values regarding respect for human rights, ethics and environmental responsibility. To that end, we are committed to the ethical sourcing of minerals including tin, tantalum, tungsten and gold. There is concern that 3TG, often referred to as “conflict minerals,” could originate from certain mines in the Democratic Republic of the Congo (“DRC”) which are controlled by armed militias who use the proceeds from the sale of these minerals to fund ongoing conflict in the region.

Keurig has prepared this Conflict Minerals Report (this “Report”) for the reporting period from January 1, 2017 to December 31, 2017. On March 3, 2016, Keurig and JAB Holding Company (“JAB”) announced the successful completion of the acquisition of Keurig by a JAB-led investor group. With the transaction complete, Keurig became a private company and an independent part of the JAB family and its leading global coffee platform. As a private company, Keurig is not subject to Rule 13p-1 under the Securities Exchange Act of 1934, as amended (the “Rule”), but has voluntarily prepared this Report using the Rule as guidance.

This Report describes Keurig’s due diligence process and voluntary compliance with the Rule’s requirements. The Rule requires disclosure of certain information when a reporting company manufactures, or contracts to manufacture, products which contain the minerals specified in the Rule, if those minerals are necessary to the functionality or production of such products. The specified minerals, which the Company collectively refers to in this Report as “3TG”, are gold, columbite-tantalite (coltan), cassiterite and wolframite and their derivatives, which are limited to tantalum, tin and tungsten. The “Covered Countries” for the purposes of the Rule and this Report are the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola.

**Reporting Scope**

As described in this Report, certain 3TG are necessary to the functionality or production of products that the Company<sup>1</sup> contracted to manufacture, or manufactured, in calendar year 2017. These products are Keurig’s brewers, as well as products manufactured and sold by the business formerly known as VKI Technologies Inc. (“VKI”) which is owned by Keurig Canada Inc., a subsidiary of the Company (collectively, Keurig’s and VKI’s in-scope products, the “Covered Products”).<sup>2</sup> Third-party products that Keurig retails but that it does not manufacture or contract to manufacture are outside of the scope of this Report.

**Our Approach**

---

<sup>1</sup> Does not include products manufactured or that were contracted to manufacture by joint ventures.

<sup>2</sup> Does not include (i) pods in accordance with the SEC’s Dodd-Frank Wall Street Reform and Consumer Protection Act, Frequently Asked Questions, #6

Keurig uses components and materials containing 3TG in its Covered Products but does not purchase 3TG directly from mines, smelters, or refiners. Therefore, we must collaborate with suppliers, industry peers, and other stakeholders as described in this Report.

Keurig is a member of the Responsible Minerals Initiative (RMI), formerly the Conflict Free Sourcing Initiative (CFSI), a multi-industry initiative addressing conflict minerals issues in the supply chain. The RMI's Conflict Minerals Reporting Template (CMRT) is a widely-used standard form to collect information through the supply chain, including the names of 3TG smelters and refiners. RMI also manages the Responsible Minerals Assurance Process (RMAP), formerly the Conflict Free Sourcing Program (CFSP), which uses independent third-party audits to assess whether 3TG smelters and refiners have systems in place to assure sourcing of only DRC-Conflict Free materials. We use the CMRT to survey our suppliers and identify smelters and refiners in our supply chain, and the RMAP to determine the country of origin and DRC Conflict-Free status of minerals.

In accordance with the Rule, Keurig has in good faith conducted a reasonable country of origin inquiry regarding 3TG. This country of origin inquiry was designed to determine whether any of the 3TG used in the Covered Products originated in the Covered Countries and whether any of such 3TG may be from recycled or scrap sources. The Company also performed due diligence on the source and chain of custody of such 3TG as described in more detail below.

Keurig's due diligence process is based on the *Organization for Economic Cooperation and Development's* ("OECD") *Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas* and accompanying Supplements (the "OECD Guidance").<sup>3</sup>

### **Reasonable Country of Origin Inquiry**

In 2017, Keurig identified its direct suppliers of Covered Products, as well as one indirect supplier of Covered Products whom Keurig engages with directly (such direct suppliers and indirect supplier, collectively, the "Suppliers"). Keurig requested that each Supplier submit information to Keurig using the CMRT.

The information submitted by Keurig's Suppliers in the CMRTs included information gathered by those suppliers about the smelters and refiners (SORs) identified in their own supply chains which Keurig utilized to conduct further due diligence. As described in more detail below, Keurig's responsible sourcing team reviewed and analyzed each CMRT received.

Keurig compared the list of SORs reported by Suppliers against the RMI's Smelter Reference List (verified 3TG smelters and refiners). The list of these verified smelters and refiners that our Suppliers reported as being in their supply chains is set forth in Annex I. The list of countries from which Keurig believes the 3TG in their products may have originated is set forth in Annex II. This information was obtained through Keurig's membership in the RMI, using the Reasonable Country

---

<sup>3</sup> OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Supplement on Tin, Tantalum and Tungsten and Supplement on Gold, 2013; <http://www.oecd.org/daf/inv/mne/GuidanceEdition2.pdf>.

of Origin Inquiry (RCOI) report dated May 18, 2018 that is available to Keurig as a member of RMI. Note that the RMI RCOI report only includes information for smelters that are “Compliant” according to RMAP. We found that:

- Some 3TG is sourced through smelters and refiners that are not yet RMAP-Compliant and therefore we have not yet determined the country of origin of those minerals;
- Some 3TG is sourced from RMAP-Compliant smelters or refiners, including smelters or refiners that source responsibly from the Covered Countries; and
- Some 3TG also may have originated from recycled or scrap sources.

In addition to the RMI RCOI data available to Keurig, select Suppliers reported to Keurig that they source from the Covered Countries in their CMRTs. Several suppliers reported that they source from the Covered countries and reported to Keurig that the reported SORs were RMAP Compliant. Keurig referenced the RMAP Compliant SOR list and confirmed that these are RMAP Compliant SORs. Other suppliers reported that they source from the Covered Countries from RMAP Compliant SORs, but did not provide the SOR names. In these cases, Keurig could not cross reference the RMAP Complaint SOR list. Ultimately, Keurig relies on the RMI RCOI data as the most accurate information for our RCOI.

The information obtained from our Suppliers indicated that there was reason to believe that a portion of 3TG used in Keurig products may have originated in the Covered Countries and were not exclusively from recycled or scrap sources, triggering the due diligence steps described in the following sections.

## **Due Diligence**

### ***Design of Due Diligence***

Keurig designed its due diligence measures in accordance with the OECD Guidance, and the related supplements on 3TG.

The OECD Guidance utilizes a five-step process for due diligence:

*Step 1: Establish Strong Company Management Systems*

*Step 2: Identify and Assess Risks in the Supply Chain*

*Step 3: Design and Implement a Strategy to Respond to Identified Risks*

*Step 4: Carry Out Independent Third-Party Audit of Smelters’ and Refiners’ Due Diligence Practices*

*Step 5: Report Annually on Supply Chain Due Diligence*

Below is a description of Keurig’s due diligence measures performed for the 2017 reporting year.

### ***Due Diligence Measures Performed***

*Step 1: Establish Strong Company Management Systems:*

The Company has adopted a policy relating to 3TG incorporating the standards set forth in the OECD Guidance (the “Company Conflict Minerals Policy”) in its Responsible Sourcing Supplier Guidelines. All of Keurig’s suppliers are required to adhere to its Responsible Sourcing Supplier

Guidelines, which are available on its website at [www.KeurigGreenMountain.com/SupplierGuidelines](http://www.KeurigGreenMountain.com/SupplierGuidelines).

The Company's Conflict Minerals Policy states in part that the Company is committed to: (1) supporting the aims and objectives of the U.S. legislation on the disclosure of 3TG; (2) not knowingly procuring 3TG that originates from facilities in the Covered Countries that are not considered Conflict Free; and (3) ensuring compliance with the Company Conflict Minerals Policy.

Members from the Company's procurement, legal, and sustainability teams were involved in the due diligence process, which was led by the Company's responsible sourcing team.

Requirements related to conflict minerals and related due diligence activities are included in our standard template for Keurig supplier contracts.

Keurig has established a system of controls and transparency to determine the smelters and refiners in its 3TG supply chain by creating a process to engage Suppliers. In this reporting year, Keurig utilized a third party software platform for the first time. This tool was used to collect, store, analyze and aggregate supplier data for reporting purposes. It was also used to send automated reminders to Suppliers throughout the due diligence process.

Keurig provided Suppliers with links to the RMI e-learning academy and other resources. Throughout the due diligence process, Keurig also engaged in ongoing communication and provided support to its Suppliers to facilitate their completion of the CMRTs.

Keurig intends to retain conflict minerals documentation materials for five years after receipt.

#### *Step 2: Identify and Assess Risks in the Supply Chain:*

As described above, as part of its due diligence process Keurig identified in scope Suppliers and requested that the Suppliers submit a completed CMRT.

Via our software platform, Keurig then reviewed Suppliers' completed CMRTs against a set of internally developed criteria for completeness and consistency. While 100% of suppliers surveyed submitted a CMRT this year, there were several CMRTs that were incomplete, or where we identified inconsistencies which we were unable to resolve with the supplier before publishing this Report despite numerous follow up requests. We intend to work with these suppliers to improve their responses year over year.

For Suppliers that indicated in their responses that they or a supplier in their supply chain did use 3TG in their part(s) and/or product(s) during calendar year 2017 and provided the applicable smelter or refiner information, the Company reconciled the reported SORs against the RMAP Compliant Smelters List (available at [www.conflictreesourcing.org](http://www.conflictreesourcing.org)) as of May 21, 2018.

#### *Step 3: Design and Implement a Strategy to Respond to Identified Risks:*

Where SORs were reported that are not RMAP-Compliant or Active (engaged in the RMAP program but not yet audited), Keurig sent a notice via the platform asking applicable Suppliers to

either work with their supply-chain to request the smelter to participate in the RMAP audit program, and/or work to remove the smelter from the supply chain. Further, there were also instances where inaccurate or outdated SOR information was reported to us, for example: smelters no longer in operation, or entities that could not be identified as known SORs. In these cases, we sent a notification to Suppliers asking them to work with their supply chain to obtain accurate smelter information. Our smelter action requests specified that we expect to see continuous improvement year over year in the reported smelter information.

In addition to the above, we also review our Suppliers' CMRTs for due diligence activities, such as whether they have their own Conflict Minerals Policy. See below the Due Diligence Results section below where we report on the number of suppliers who provided a policy that indicates a commitment to reasonably ensuring that only conflict-free materials and components are used in products/parts that are sold to Keurig.

Lastly, several Suppliers indicated in their responses that they have not received complete information from their suppliers. When this happened, we requested that they work to improve their response rate.

#### *Step 4: Carry Out Independent Third-Party Audit of Smelters' and Refiners' Due Diligence Practices*

As a member of RMI, Keurig leverages information from the independent third party audits of the SORs facilitated by initiatives such as the RMI's RMAP and the London Bullion Market Association (LBMA), or Responsible Jewelry Council (RJC).

#### *Step 5: Report Annually on Supply Chain Due Diligence:*

As discussed above, Keurig is voluntarily reporting on supply chain due diligence by publishing a Conflict Minerals Report for calendar year 2017 on Keurig's corporate website ([www.KeurigGreenMountain.com](http://www.KeurigGreenMountain.com)).

### ***Due Diligence Results***

Many of our supplier responses represented their supply chain at a company level rather than being product specific. Therefore, the list of SORs contained in this report may contain more facilities than those that actually process the conflict minerals contained in our products.

The total number of unique entities reported as SORs by the Keurig supply base as a result of the 2017 survey was 437. Of these, 314 have been confirmed as being legitimate SORs by the RMI, 71 were known to not be legitimate SORs, and there were 52 reported entities whose status could not be confirmed as of our cutoff date of May 25, 2018.

Of the 314 legitimate SORs reported by Keurig Suppliers, 252, or 80% had been validated by the RMI RMAP program as being in conformance with an RMI recognized conflict free audit protocol (RMAP, LBMA, or RJC). Another 15 were in process or communication with RMAP, or participating in another recognized program, but had not achieved validated status as of May 21, 2018. The remaining 47 have not been validated by the RMAP program as Compliant. A list of all

314 of the legitimate smelters and refiners identified during the due diligence process is included in Annex I to this Report.

The 122 entities reported by our Suppliers that are not currently considered legitimate smelters fell into three categories:

- 70 companies that had been reclassified by RMI due to better understanding of their business (group company or did not meet the definition of a smelter)
- 1 legitimate smelter that had either temporarily or permanently suspended operations
- 52 entities whose status could not be confirmed

As described above, we also requested Suppliers provide a policy that indicates a commitment to reasonably ensuring that only Conflict Free materials and components are used in products/parts sold to Keurig. 37% of Suppliers provided a policy that meets this criteria.

### **Future Due Diligence Improvements**

Keurig plans to continue to improve its due diligence measures by taking the following steps, among others:

- Continuing to engage with Suppliers to obtain current, accurate and complete information about our supply chain, encourage them to continue building up their due diligence process including their own conflict minerals policy;
- Increasing our level of participation in RMI working groups; and
- Continuing to encourage Suppliers to request non-Compliant smelters to participate in the RMAP audit program, and/or work to remove such smelters from the supply chain.

### **Determination**

Based on the information obtained pursuant to the due diligence process described above, Keurig believes that the facilities that may have been used to process the 3TG in Keurig products include the smelters and refiners listed in Annex I below. The list of countries from which Keurig believes the 3TG in their products may have originated as well as any materials from recycled and scrap sources, is set forth in Annex II. The smelter information collected from our Suppliers continued to include a number of SORs that had not been audited and validated as Conflict Free by the RMAP, or any other recognized organization. The possible existence of such facilities in our supply chain is sufficient to prevent us from declaring with certainty that no armed groups directly or indirectly benefited as a result of the mining, transport for processing of 3TG in our products. For these reasons, we are unable to determine that any of our products are DRC Conflict-Free.

Keurig has provided information as of the date of this Report. Subsequent events, such as the inability or unwillingness of any suppliers, smelters or refiners to comply with Keurig's Conflict Minerals Policy, may affect Keurig's future determinations.

**ANNEX I**  
**List of Smelter Facilities**

The table below represents a consolidated list of SORs (314 in total) identified by Keurig’s Suppliers. The results are based on:

- Information provided by Keurig’s Suppliers in their CMRTs; and
- The RMAP Compliant Smelters Lists as of May 21, 2018

“Smelter Country” refers to the location of the SOR, not the source of minerals. Refer to [Annex II](#) for the list of countries from which 3TG may have originated.

## ANNEX II

### Countries from which the minerals in the Covered Products may have originated

Based on RMI's Reasonable Country of Origin Inquiry report dated May 18, 2018, the countries of origin of the 3TG processed by facilities listed in ANNEX I are believed to include the following:

Argentina	Greece	Nigeria
Armenia	Guatemala	Norway
Australia	Guinea	Panama
Austria	Guyana	Papua New Guinea
Azerbaijan	Honduras	Peru
Belarus	Hong Kong	Philippines
Belgium	Hungary	Poland
Benin	India	Portugal
Bolivia (Plurinational State of)	Indonesia	Romania
Bosnia and Herzegovina	Ireland	Russian Federation
Brazil	Israel	Rwanda
Bulgaria	Italy	Saudi Arabia
Burkina Faso	Ivory Coast	Senegal
Burundi	Japan	Serbia
Canada	Kazakhstan	Sierra Leone
Chile	Kenya	Singapore
China	Kyrgyzstan	Slovakia
Colombia	Laos	South Africa
Congo, Democratic Republic of the	Latvia	South Korea
Costa Rica	Liberia	Spain
Czech Republic	Liechtenstein	Suriname
Denmark	Lithuania	Sweden
Djibouti	Luxembourg	Switzerland
Dominican Republic	Macau	Taiwan
Ecuador	Madagascar	Thailand
Egypt	Malaysia	Togo
Eritrea	Mali	Turkey
Estonia	Mauritania	Uganda
Ethiopia	Mexico	United Arab Emirates
Fiji	Mongolia	United Kingdom of Great Britain and Northern Ireland
Finland	Morocco	United States of America
France	Mozambique	Uruguay
Gabon	Myanmar	Uzbekistan
Georgia	Namibia	Venezuela
Germany	Netherlands	Viet Nam
Ghana	New Zealand	Zimbabwe
	Nicaragua	
	Niger
